Purextract has developed a specific range of ingredients dedicated to beautiful skin. The global beauty market reached US$ 8 billion in 2013. Despite the tough economic situation, consumers – especially women above 35 – are not willing to reduce their spending on products which help prevent the signs of aging. To gain consumer trust, ingredients need to have proven efficacy and demonstrate results within 3 months. The positive effects of Cosmythic® on the skin have been proven in a double-blind, placebo-controlled clinical study, showing first results after 28 days only.

Food supplements

“Healthy aging” has become central to the way we live our lives. It is now possible to help maintain our well-being with the active ingredients formulated in dietary supplements. Cardiovascular health is a key concern for the aging demographic. More people die of CVDs (30%) globally than any other single cause. Purextract’s products are strongly positioned in terms of cardiovascular well-being, with proven benefits in LDL oxidation, lowering cholesterol and lowering blood pressure. As a result, Oligopin®, Vitaflavan®, Phytopin® and Effaline® are used in more than 250 products around the world.

Nutricosmetic

Purextract has developed a specific range of ingredients dedicated to beautiful skin. The global beauty market reached US$ 8 billion in 2013. Despite the tough economic situation, consumers – especially women above 35 – are not willing to reduce their spending on products which help prevent the signs of aging. To gain consumer trust, ingredients need to have proven efficacy and demonstrate results within 3 months. The positive effects of Cosmythic® on the skin have been proven in a double-blind, placebo-controlled clinical study, showing first results after 28 days only.

Functional food

Functional food and drink sales were up by 20% between 2007 and 2013, reaching US$ 246 billion in sales in 2013 worldwide. This growth is driven by better consumer understanding of the potential health benefits of food and drinks, higher levels of disposable income and a desire to live longer. Functional ingredients with a strong basis in science like Oligopin® and Cosmythic® can be used in functional food to good effect for our health and well-being. The new, highly water-soluble formulation of Oligopin® HWS and Cosmythic® HWS will help to increase the consumer appeal of your finished product, leading ultimately to greater brand loyalty and continued consumer investment in your superior product.

Cosmetics

New product development in facial care is driven by moisturizing and botanical formulas. One in two women worldwide uses a facial skincare product to treat or prevent dry skin, which is why Purextract has focused on this particular issue. Phytopin® Derm’expert is a natural ingredient proven to be effective and soothing for dry skin when used in moisturizing creams, lotions and cleansers.

Customized Extraction

Purextract offers customised extraction for the specific needs of your industry. Please contact us.

Purextract is a vertically integrated manufacturer providing complete traceability, from the sourcing of raw material to the delivery of its products range in your warehouses.

The highest level of safety

Purextract is a vertically integrated manufacturer providing complete traceability, from the sourcing of raw material to the delivery of its products range in your warehouses.

Commitment to quality

Purextract’s expertise lies in the transformation of raw materials through a unique process of extraction.

The high concentration of active ingredients makes Purextract’s polyphenols and sterols the purest on the market. This purity directly affects the efficacy of the end result food supplements.

Sourcing

Purextract is headquartered in the heart of the Landes forest, ideally located between the vineyards of Bordeaux and Spain. Purextract practices a rigorous selection of raw materials from local suppliers only.

For Purextract, sourcing is a profession of its own. Its principles? Encouraging the use of local resources, using quality by-products, establishing long-term partnerships with suppliers. Pine bark, grape seeds and olive leaves are the by-products of regional industries (food and wood industries etc.) and constitute a raw material of numerous applications and proven benefits.

Pure, local and green, Purextract sourcing aims at reducing raw materials transport and consequently its ecological footprint. Working locally to shine internationally, Purextract offers only natural ingredients, developed with the greatest respect for the environment.

### Major technological innovation:

Cosmythic and Oligopin, purified pine bark extracts are now available in a unique highly water soluble grade easy to formulate in fruit juices, tea, coffee, one shot drinks and mineral water. (insoluble matter < 0.2%)
Phytopin Pur’expert: phytosterols have received an EFSA health claim allegation for their contribution to the maintenance of normal blood cholesterol levels.

Oligopin and Cosmythic: many scientific studies (including clinical ones) have been carried out on the effectiveness of our pine bark extracts.

Effialine: the EFSA agency delivered a positive scientific opinion on the efficacy of Olive-based polyphenols for their health benefits in preventing LDL oxidation. Olive leaf extract is used in traditional medicine for its hypotensive properties.

Vitaflavan and VitaS: scientific studies and publications have shown the effectiveness of our grape seed extracts in different fields of application.
The DRT commitment

Purextract is the plant extraction division of DRT (Dérivés Résiniques et Terpéniques), a Landes-based company specialized in natural ingredients.

DRT is a key player in the global resins and fragrance markets, recognized around the world for the purity of its products and its commitment to preserving nature.

Founded in 1932, DRT cultivated a unique expertise for the extraction of natural essences. In the late 1950s DRT opened a research and development center focused on the use of phytosterols at the Vieille-Saint-Girons site. Since then, DRT has produced and marketed Purextract as a product with very high levels of natural active ingredients.

Located at the western edge of the Landes forest, just a few kilometers away from the Atlantic ocean, the Vieille-Saint-Girons site is ideally located for the development and manufacture of natural extracts.
